PORTABLE POWER BATTERY PACK FOR NINTENDO® 3DS

3DS-CD

For many gamers, the battery life of the Nintendo 3DS ™ just doesn't cut it. Fortunately you can double the battery life of your 3DS with CTA Digital's Portable Power Battery Pack. What makes the battery pack so unique is it's internal lithium ion battery, which doubles your power, acts as an external battery and also a wireless charger to the 3DS stock battery. It also has a built in stand so you can position your 3DS just the way you like it. Once the battery pack is fully charged using the included USB cable, you can play and recharge your 3DS anywhere, without any wires. Simply attach the battery pack to the back of the 3DS, push the power button and your all set! Unlike other 3DS external batteries, there's no assembly required, and no need to unscrew and tamper with the back of your 3DS. The 4 blue LED lights on the right indicate it's power status and when it's fully charged the red light on the left will turn green. This way you know exactly how much power you've got, and if you find yourself with no power at all, the battery pack acts as an external battery to power the 3DS. So with the Portable Power Battery Pack for Nintendo 3DS™, you can enjoy the freedom of gaming for hours wherever you want.

2X DOUBLE YOUR BATTERY LIFE!
